Meta Model API Acceptable Use Policy

Meta is committed to promoting safe and fair use of its tools and features, including Services and Meta Materials as defined in the Meta Model API Terms of Service. For the purposes of this Acceptable Use Policy, references to the "Services" include such "Meta Materials".

Prohibited Uses.

We want everyone to use the Services safely and responsibly. You agree that you will not use, or allow others to use, any Services, including any Outputs or Actions, or any Integrated Products (each as defined in the Meta Model API Terms of Service) to:

- Violate the law or others' rights, including to:
  - Infringe or facilitate the infringement of obligations under applicable law intended to protect fundamental rights, including, but not limited to, those relating to non-discrimination, privacy, data protection, freedom of expression, due process and access to justice
  - Engage in, promote, generate, contribute to, encourage, plan, incite or further illegal or unlawful activity or content, such as:
    - Violence or terrorism
    - Exploitation or harm to children, including the solicitation, creation, acquisition or dissemination of child exploitative content or failure to report child sexual abuse material
    - Human trafficking, exploitation and sexual violence
    - The illegal distribution of information or materials to minors, including obscene materials, or failure to employ legally required age-gating in connection with such information or materials
    - Sexual solicitation
    - Any other criminal activity
  - Engage in, promote, incite or facilitate the harassment, abuse, threatening or bullying of individuals or groups of individuals
  - Engage in, promote, incite or facilitate discrimination or other unlawful or harmful conduct in the provision of employment, employment benefits, credit, housing, leases, loans, other economic benefits, or other essential goods and services
  - Engage in the unauthorised or unlicensed practice of any profession including, but not limited to, financial, insurance, legal, medical/health, tax or other professional practices
  - Collect, process, disclose, generate or infer private or sensitive information about individuals, including information about individuals' identity, health or demographic information, unless you have obtained the right to do so in accordance with applicable law
  - Create, generate or share adult sexual or intimate imagery or clone or generate the voice or likeness of a real, identifiable person without their consent, including AI-generated or digitally altered (e.g. "deepfake") depictions
  - Create, generate, distribute or facilitate the creation of malicious code, malware, computer viruses or do anything else that could disable, overburden, interfere with or impair the proper working, integrity, operation or appearance of a website or computer

system, including conducting or facilitating cyberattacks or other malicious or abusive cyber activity

Compromise, damage, destroy, breach, exfiltrate or gain or attempt to gain unauthorised access to another's systems, networks, applications, devices, accounts, repositories, credentials or other property, including through technical attacks, social engineering or bypassing, disabling or defeating any security control, authentication, endpoint protection or monitoring measure

Cause or materially contribute to a serious cybersecurity incident affecting the security, integrity or availability of Meta or third-party products, services and network and information systems

Identify, scan for or exploit vulnerabilities in any system, network or application without proper authorisation from the system, network or application owner

Develop, enhance or operationalise tools, frameworks or capabilities designed primarily for offensive cyber operations or as cyberweapons

Compromise or introduce vulnerabilities, backdoors or malicious code into software supply chains, code repositories, package managers, update mechanisms or shared development infrastructure

Remove, alter, obscure or otherwise tamper with any watermark, label, metadata or other provenance signal applied to or associated with any Meta technologies, including the Services (whether as part of Integrated Products or otherwise) or any Outputs

Distribute or make available Outputs (including through any Integrated Products) without preserving watermarks, labels, metadata or other provenance signals that Meta has applied to such Outputs

Engage in any action, or facilitate any action, to intentionally circumvent, bypass, disable or remove usage restrictions or other safety or security measures or controls, or to enable functionality disabled or restricted by Meta

Create or use accounts, identities, access or use methods to evade enforcement actions, suspensions, controls or other restrictions previously imposed by Meta

Deploy or use the Services, Outputs or any Integrated Products without completing any regulatory classification, registration or authorisation required of AI systems under applicable law

Use the Services or any Integrated Products for prohibited biometric or surveillance practices, including to:

Identify or track a specific individual based on biometric data, including facial recognition, without a lawful basis and consent where required by applicable law

Engage in the untargeted scraping of facial images from the Internet or CCTV footage to build facial recognition databases

Engage in emotion recognition in the workplace or education, save as permitted by applicable law

Categorise people based on their biometric data to deduce or infer their race, political opinions, trade union membership, religious or philosophical beliefs, sex life or sexual orientation

Engage in real-time biometric identification in publicly accessible spaces for the purposes of law enforcement, save as permitted by applicable law

Deploy subliminal, manipulative or deceptive techniques to distort behaviour by impairing decision making, or exploit people due to their age, disability or a specific social or economic situation to distort their behaviour

Evaluate or classify individuals based on social behaviour or personal traits in a manner that leads to detrimental or unfavourable treatment, either in a context unrelated to the original data or that is unjustified or disproportionate

- Engage in predictive policing or criminal risk assessments based on profiling or assessing personality traits and characteristics
- Conduct or facilitate mass or indiscriminate surveillance of people, places, groups or events for law enforcement or national security purposes

Engage in, promote, incite, facilitate or assist in the planning or development of activities that present a risk of death, serious harm to health, bodily harm to individuals or serious harm to property or the environment, or serious and irreversible disruption of the management or operation of critical infrastructure, including use of the Services or any Integrated Products related to the following:

- Military, warfare, nuclear industries or applications, espionage, use for materials or activities that are subject to the International Traffic in Arms Regulations (ITAR) maintained by the United States Department of State or to the US Biological Weapons Anti-Terrorism Act of 1989 or the Chemical Weapons Convention Implementation Act of 1997, or in a manner that would violate US or other applicable export control restrictions
- Firearms, explosives and illegal weapons (including weapon development)
- Illegal drugs and regulated/controlled substances
- Operation of critical infrastructure, transportation technologies or heavy machinery
- Self-harm or harm to others, including suicide, cutting and eating disorders
- Any content or actions intended to incite or promote violence, extremism, terrorism, abuse or any infliction of bodily harm to an individual

Intentionally deceive or mislead others, including use of the Services or any Integrated Products related to the following:

- Generating, promoting or furthering fraud or the creation or promotion of disinformation
- Generating, promoting or furthering defamatory content, including the creation of defamatory statements, images or other content
- Generating, promoting or further distributing spam
- Impersonating another individual without consent, authorisation or legal right
- Representing that Outputs are human-generated
- Generating or facilitating false online engagement, including fake reviews and other means of fake online engagement

Use the Services to operate AI agents (including models, harnesses or other components thereof) or automated systems or otherwise take Actions in ways that evade human oversight or accountability, including to:

- Circumvent, disable or evade human review, monitoring or other oversight controls applicable to the Services
- Conceal an agent's actions, objectives or automated nature where disclosure is required, or split tasks across sessions, accounts or agents to evade detection or safeguards
- Delegate to, or coordinate with, other systems or persons to carry out actions that would be prohibited if performed directly
- Use the Services to autonomously interact with systems or services in a manner that violates the terms of service or acceptable use policies of those systems or services
- Take consequential or irreversible actions through connected accounts, tools or services, including entering binding legal commitments or executing destructive operations in production environments, without appropriate authorisation, human oversight, review and confirmation mechanisms

Fail to appropriately disclose to End Users any known material risks or limitations of your Integrated Products or other AI systems, where such disclosure is required by applicable law or necessary to prevent reasonably foreseeable harm

Interact with third-party tools, models or software designed to generate unlawful content or engage in unlawful or harmful conduct and/or represent that the outputs of such tools, models or software are associated with Meta or its Services

Exceptions.

Meta may, at its sole discretion, grant exceptions to this Acceptable Use Policy for legitimate cybersecurity research, educational purposes, governmental use cases or other circumstances where Meta determines that adequate safeguards are in place to mitigate the potential harms addressed by this policy. To inquire about obtaining an exception, contact aup_exceptions@meta.com.
